

Patricio Albizu

Senior Frontend Engineer | Angular, React, TypeScript

Tandil, Argentina | Remote (US & EU time zones) | Italian (EU) citizen | Available immediately
albizupatricio@gmail.com | patricioalbizu.com | linkedin.com/in/patricio-albizu | github.com/albizupatricio

SUMMARY

Senior frontend engineer with 10+ years building enterprise web applications in Angular and TypeScript, plus 2+ years shipping React apps in production. Five years at Traceable AI (acquired by Harness) as technical owner of a core security module, through the platform's growth from 3 to 80+ enterprise clients. Previously frontend tech lead on Globant's Deloitte account and interviewer for 100+ frontend candidates. Remote experience with US and India teams.

SKILLS

Languages & frameworks: TypeScript, JavaScript (ES6+), Angular (Signals, standalone components, new control flow), AngularJS, React (hooks, Context API), Next.js, HTML5, CSS3, Sass

UI: Tailwind CSS, Angular Material, Bootstrap, Kendo UI, design systems, data visualization, responsive design, accessibility, Figma

State management: Redux, RxJS, React Context, NgRx (coursework)

Testing & tooling: Unit testing (Jest, Jasmine, Karma), Git, GitHub, CI/CD (GitHub Actions, Aviator merge queue), Docker, Jira

APIs, backend & cloud: GraphQL, REST APIs, Firebase (Firestore), Supabase (PostgreSQL), Azure, Vercel

Ways of working: Agile/Scrum, AI-assisted development (Claude Code), code review, mentoring, technical interviewing

EXPERIENCE

Senior Frontend Engineer

Traceable AI (acquired by Harness) | Remote | Feb 2021 – Mar 2026

- Technical owner of a core application-security module. Kept evolving its architecture as the customer base went from 3 to 80+ enterprise clients.
- Co-built the UI foundation of [Hypertrace](#), the company's open-source distributed tracing platform (520+ GitHub stars).
- Designed Angular components to visualize distributed traces and AI-detected security alerts for engineering and security teams.
- Helped migrate the platform from NgModules to standalone components and the new control flow (@if, @for), reducing boilerplate, then developed new features using Signals for reactive state.
- Merged 1,200+ pull requests over five years, one of the most active contributors to the codebase.
- Onboarded and mentored new engineers as the frontend team grew from 5 to 12, and reviewed code for the whole team. Worked daily with engineering and product in the US and India.

Stack: Angular, TypeScript, RxJS, GraphQL, Sass, Tailwind CSS, Jest, GitHub Actions, Aviator

Frontend Engineer

SparkDigital (now Intive), client: Kaplan | Remote | Jul 2020 – Mar 2021

- Developed enrollment and student-advising modules for Purdue University's Virtual Advisor platform.
- Worked in a distributed US/Argentina Scrum team, keeping code and architecture consistent across squads.

Stack: Angular, TypeScript, Sass, Bootstrap

Frontend Tech Lead

Globant, client: Deloitte | On-site, Tandil | Jan 2020 – Jul 2020

- Led frontend development for GreenHouse, Deloitte's global event-management platform, including the UI for complex multi-office booking rules.
- Led the platform's migration to Angular and Angular Material.
- Ran 100+ technical interviews for frontend roles across the Deloitte account.

Frontend Engineer

Globant, client: Deloitte | On-site, Tandil | Nov 2016 – Jan 2020

- Built the VC Planner module from scratch in Angular, replacing legacy reservation workflows, and led UI testing in UAT before rollout.
- Delivered admin modules for Deloitte University (students, courses, facilities) with AngularJS, TypeScript and Kendo UI.
- Improved the performance of existing Deloitte modules used by staff worldwide.

Stack: AngularJS, Angular, TypeScript, Angular Material, Bootstrap, Kendo UI

Full-Stack Developer (part-time)

Grupo Ceres Tolvas | On-site, Tandil | Sep 2015 – Nov 2016

- Started as a support intern and moved into development within a year.
- Built internal logistics and transport management systems for 20+ grain storage facilities, from UI to database.

Stack: .NET, Visual Basic 6, SQL Server

FREELANCE & PROJECTS

Personal Website (Full-Stack)

Personal project | patricioalbizu.com | May 2026 – Sep 2026

- Portfolio site built with Next.js and React, using function components and hooks.
- Raised the Lighthouse mobile performance score from 58 to 83, with 100 in accessibility, best practices and SEO.
- Backend on Supabase: designed a relational PostgreSQL schema for a visitor guestbook and contact form, plus a daily scheduled job that emails a digest of new entries.

Stack: Next.js, React, Supabase (PostgreSQL), Claude Code

Frontend Developer & Designer

Julieta Heduvan Consulting | Remote | Mar 2026 – Apr 2026

- Designed and built the firm's website as sole developer and designer, with services, articles and a contact form served from Firestore. Used Claude Code to speed up delivery.
- Lighthouse scores: 92 performance, 100 SEO, 100 best practices.

Stack: Angular, Tailwind CSS, Firebase

Frontend Developer (part-time)

Lo de Mario | Remote | Jan 2020 – Jul 2022

- Sole developer of a React app for a family-owned Argentine food chain: a customer-facing product and store browser plus a real-time admin dashboard, sharing state through Redux.
- The app was used daily by the chain's customers and reached a 94 Lighthouse performance score.

Stack: React, Redux, Firebase, Bootstrap

EDUCATION

- **Systems Engineer** (Ingeniero de Sistemas) | UNICEN, Universidad Nacional del Centro de la Provincia de Buenos Aires | 2019
- **University Programmer Analyst** (Analista Programador Universitario) | UNICEN | 2016
