

PATRICIO ALBIZU

Senior Frontend Engineer — Angular & React | Architecture, Team Leadership, Mentoring

Tandil, Argentina — Remote (US time zones) • Italian Citizenship (EU) • **Available Immediately**

www.patricioalbizu.com • linkedin.com/in/patricio-albizu • github.com/albizupatricio • albizupatricio@gmail.com

10+ Years Experience • **35+** Courses & Certifications • **10+** Client & Company Collaborations • **100+** Technical Interviews Led

SUMMARY

Senior Frontend Engineer with 10+ years architecting, building, and scaling production frontend systems — from early-stage startups to Big Four enterprise accounts — across Angular and React, increasingly working alongside Claude AI to accelerate delivery. Technical owner of a core platform module at Traceable AI (acquired by Harness), evolving its architecture as the enterprise client base grew from 3 to 80+ clients. Proven track record in technical leadership: led frontend strategy for a mission-critical Deloitte platform, contributed to growing a frontend team from 5 to 12 engineers, and ran 100+ technical interviews. Comfortable owning delivery end-to-end as a solo/freelance engineer or embedded within distributed teams across the US, India, and Argentina.

CORE SKILLS

Frameworks & Languages: Angular, React, TypeScript, JavaScript (ES6+), Next.js, HTML5, CSS3, Sass

UI & Design Systems: Tailwind CSS, Material Design, Bootstrap, Redux, Component Architecture, Figma, Accessibility

Testing & Tools: Jest, Jasmine, Karma, Git, Jira, Trello, Claude AI

Backend, Databases & DevOps: Firebase (Firestore), Supabase (PostgreSQL), Azure, Docker, Vercel, Aviator (Merge Queue/CI)

Practices: Agile, Scrum, AI-Assisted Development (Claude AI), Technical Leadership, Mentoring, Performance Optimization

WORK EXPERIENCE

Senior Frontend Engineer — Traceable AI (acquired by Harness)

Feb 2021 – Mar 2026

Remote

- **Served** as technical owner of a core application-security module, evolving its architecture as the enterprise client base grew from 3 to 80+ clients.
- **Co-built** Hypertrace, an open-source distributed tracing engine (520+ GitHub stars), developing the UI foundation for the platform's observability and security capabilities.
- **Merged 1,200+** pull requests across Traceable's core platform and Hypertrace over five years, ranking among the most active contributors to the shared codebase.
- **Engineered** specialized Angular components to visualize distributed traces and AI-detected security alerts, turning complex backend data into clear, actionable workflows.
- **Contributed** to growing the frontend team from 5 to 12 engineers as the product matured, coordinating daily with engineering and product stakeholders across India and the US.

Stack: Angular, TypeScript, Sass, Tailwind CSS, Jest, Aviator, Component Architecture

Recognized by Harness/Traceable engineering leadership (Principal Engineer, UI, QA) on LinkedIn for technical depth, cross-timezone collaboration, and reliability.

Frontend Engineer — SparkDigital (now Intive), Kaplan account

Jul 2020 – Mar 2021

Remote

- **Built** UI modules for Purdue University's Virtual Advisor platform, covering enrollment and student-advisory flows for a distributed US-Argentina team.
- **Maintained** architectural consistency and code quality across international teams under an Agile/Scrum delivery model.

Stack: Angular, TypeScript, Sass, Bootstrap, Agile/Scrum

Globant — Deloitte Global account • Nov 2016 – Jul 2020 • On-site

Tech Lead — Deloitte (GreenHouse)

Jan 2020 – Jul 2020

- **Led** the frontend strategy for GreenHouse, Deloitte's global event-management platform, architecting a secure interface for complex, multi-office booking rules.
- **Directed** the migration to Angular and Material Design, improving responsiveness and modularity for a high-concurrency, international user base.
- **Conducted 100+** technical interviews for frontend roles, setting the technical bar for hiring across the account.

Frontend Engineer — Deloitte (Deloitte University & VC Planner)

Nov 2016 – Jan 2020

- **Migrated** legacy reservation workflows into a modern Angular/Material Design architecture, building the VC Planner sub-module from scratch and leading UI-side UAT to catch issues before rollout.
- **Engineered** core administrative modules for Deloitte University, a global platform managing students, courses, and infrastructure, using AngularJS, TypeScript, Bootstrap, and Kendo UI.
- **Operated** within multicultural, distributed teams under Big Four quality standards.
- **Improved** front-end performance and responsiveness across existing Deloitte modules as an ongoing part of the role, enhancing the experience for a global workforce.

Stack: AngularJS, Angular, TypeScript, Bootstrap, Kendo UI, Material Design

Full-Stack Developer — Grupo Ceres Tolvas

Sep 2015 – Nov 2016

On-site · Part-time

- **Progressed** from data-entry/support intern to part-time full-stack developer within a year, building internal logistics and transportation management systems for a network of 20+ grain storage facilities.
- **Contributed** across the full development lifecycle — from frontend UI to database design — using .NET, Visual Basic 6, and SQL Server.

Stack: .NET, Visual Basic 6, SQL Server

FREELANCE PROJECTS

UI/UX Engineer — Julieta Heduvan Consulting

Mar 2026 – Apr 2026

Remote

- **Delivered** a corporate platform end-to-end as sole developer and designer for an international strategic consulting firm — owning UX, architecture, and deployment.
- **Shipped** a responsive site with Angular and Firebase, serving dynamic content (services, articles, contact form) from Firestore, using Claude AI to accelerate implementation — achieving a 92 Lighthouse Performance score with 100 SEO and 100 Best Practices.

Stack: Angular, Tailwind CSS, Firebase, Claude AI

UI/UX Engineer — Lo de Mario

Jan 2020 – Jul 2022

Remote

- **Built** a web application for a mid-sized, family-owned Argentine food chain as sole developer — a customer-facing product/store browser and a real-time admin dashboard for instant content updates, using Redux for centralized state management across both.
- **Sustains** ~7.8GB of monthly customer traffic in production while maintaining a 94 Lighthouse Performance score, reflecting active day-to-day use by the chain's customer base.

Stack: React, Firebase, Redux, Bootstrap

EDUCATION

- Software Engineer (MSc equivalent) — Universidad Nacional del Centro de la Provincia de Buenos Aires (UNICEN)
- Systems Analyst (BSc equivalent) — Universidad Nacional del Centro de la Provincia de Buenos Aires (UNICEN)
